Dear Bill, 11/7/96

In yesterday's mail were the Epilogie and Afterword for Waketh, from Dennis.

I return them to him today, with not many corrections but with a page that somehow was omitted in the copying. Which I did.

Both come to 37 pages. There will thus be 38.

I'm asking Dennis to send you a disk so you can have the complete thing and perhaps make copies to go with those you have made.

It would be good for Earl Slater to have these because he has ideas on getting attention to it. If he did not give you his address it is 2576 Ashbrook Drive, Ellicott City, MD 21043.

With others, when and as you can.

I know nothing about such things but unless you and Dennis have checked on the computer program(s) you have it would be good to let him know. He seems to have the capability for conversion into almost any prog ram.

Again, many thanks and best to you all,

Harold
